Rope Dome
VVZ-LP013-T

VVZ-LP013-T Rope Dome

The rope dome consists of rope nets of various sizes and plastic rings with integrated handholds. Children can climb across the outside of the structure or enter the interior through open passageways, providing a variety of climbing and play opportunities. Moving across the rope nets naturally supports the development of coordination, balance, strength and agility. The steel structure with a durable surface finish is complemented by polyester ropes with a steel core, offering high strength, colour stability and resistance to UV radiation, weather conditions and mechanical stress. The connecting components are made of stainless steel.

Specifications

The Rope Dome VVZ-LP013-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.00 x 5.00 x 2.20 m (L x W x H)
Max. Fall Height:	up to 2.00 m
Safety Surfacing Area:	Ø 8.40 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners
Weight:	380 kg
