VVZ-OP1-01-T Monkey trail – Rope net

The monkey trail with a vertical rope net is a play element that naturally supports the development of upper-body strength, coordination, stability and overall agility. While moving across the rope net, children engage their arms and whole body while developing confidence in movement. The strong polyester ropes offer high resistance to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
