VVZ-OP1-04-T Monkey trail – Balance ladder

The monkey trail with a balance ladder creates a moving route that naturally supports the development of coordination, stability, balance and overall agility. As children cross the individual rungs, the suspended ladder moves and tilts from side to side, increasing the challenge of every step. The polyester ropes offer high strength and resistance to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
