VVZ-OP1-05-T Monkey trail – Balance bar

The monkey trail with a balance bar is designed for sideways movement, with children moving along the fixed lower bar while holding onto suspended ropes. The combination of a narrow foothold and moving ropes naturally supports the development of balance, coordination, arm strength and overall agility. The strong polyester ropes are resistant to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments..
