VVZ-OP1-13-T Monkey trail – Balance steps

The monkey trail with HPL balance steps and vertical support ropes naturally supports the development of coordination, stability, balance and overall agility. As children move across the individual steps, they use the suspended ropes for support while continuously adjusting their body position to the movement of the element. The polyester ropes offer high strength and resistance to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
