VVZ-OP1-14-T Monkey trail – Climbing wall

The monkey trail with a climbing wall offers children a physical challenge focused on developing upper-body strength, coordination and overall agility. Openings positioned at different heights provide handholds and footholds for moving across the wall. Climbing engages the arms, legs and core while naturally developing strength and confidence in movement. The steel support structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
