VVZ-OP2-01-T Two-part monkey trail

The double monkey trail combines a vertical rope net with balance bars suspended on polyester ropes. The rope net supports the development of upper-body strength and coordination, while the moving bars challenge balance, stability and overall agility. Combining two different physical activities creates a more varied route that engages the whole body. The steel structure with a durable surface finish, strong polyester ropes and stainless-steel fasteners ensures high durability and a long service life in outdoor environments.
