VVZ-OP2-02-T Two-part monkey trail

The double monkey trail combines balance stones with moving climbing panels positioned at different heights. Crossing the suspended stones develops balance and stability, while the climbing section engages the whole body and supports strength, coordination and agility. The different ways of overcoming the two sections create a varied and more challenging activity route. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
