Single-Tower Combined Play Structure - High
VVZ-VZ1-004-10-T

VVZ-VZ1-004-10-T Single-Tower Combined Play Structure - High

This single-tower combined play structure features a tower with ramparts, which children can climb using a rope climbing wall or a ladder climber, then descend via the slide. The steel structure is weather-resistant thanks to galvanising and coating with durable powder paint. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical stress. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Single-Tower Combined Play Structure - High VVZ-VZ1-004-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	2.70 x 0.90 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.00 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
