**VVZ-VZ1-005-10-T Single-Tower Combined Play Structure - Low**

This single-tower combined play structure features a tower that children can climb using a rope climbing wall or a climbing wall with handholds, and descend via the slide. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HDPE plastic used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.
