VVZ-VZ1-006-15-T Single-Tower Combined Structure - Tall

This single-tower combined play structure features a tower with battlements, which children can climb using steps or a climbing wall with handholds, then descend via the slide. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury from sharp edges or fragments. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.
