VVZ-VZ1-009-15-T Single-Tower Combined Play Structure - Low

This single-tower combined play structure features a tower that children can climb via steps or a climbing wall with handholds, then descend using one of two slides. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, eliminating the risk of injury from sharp edges or splinters. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.
