Single-Tower Combined Play Structure - Low
VVZ-VZ1-010-15-T

VVZ-VZ1-010-15-T Single-Tower Combined Play Structure - Low

This single-tower combined play structure invites children to climb up via steps or a rope climbing wall and come back down on one of two slides. Its striking design catches children's attention and invites play from a distance. The steel structure resists weathering thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, eliminating the risk of injury from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself resists microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Single-Tower Combined Play Structure - Low VVZ-VZ1-010-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.40 x 4.10 x 2.50 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	6.90 x 7.70 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
Weight:	215 kg

Single-Tower Combined Play Structure - Low
