Single-Tower Combined Play Structure - Tall with Swing VVZ-VZ1-011-15-T

VVZ-VZ1-011-15-T Single-Tower Combined Play Structure - Tall with Swing

A single-tower combined play structure that children can climb using steps, then descend via one of two slides. The play structure includes a swing beam with two seats, Classic, Baby, or a combination of both. The bold design invites children to play even from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage. This means there is no risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Single-Tower Combined Play Structure - Tall with Swing VVZ-VZ1-011-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	4.10 x 5.50 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	8.30 x 7.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, rubber, stainless steel fasteners and chains
Weight:	305 kg
