

Double-Tower Combined Play Structure - Tall VVZ-VZ2-002-10-T

VVZ-VZ2-002-10-T Double-Tower Combined Play Structure - Tall

Double-tower combined play structure - two towers connected by a tunnel. Children can access the structure by steps or by a climbing wall with handholds, and slide back down via the slide. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury to children from sharp edges or splinters. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.
