# Double-Tower Combined Play Structure - Tall with Roof VVZ-VZ2-006-15-T

**VVZ-VZ2-006-15-T Double-Tower Combined Play Structure - Tall with Roof**

This double-tower combined play structure features one tower with a roof and a second, lower tower with a flag-shaped shade panel, connected by a tunnel. Children can climb up using the climbing wall with handholds, the arch rope net, or the ladder climber, and come back down via the slide or the climbing pole. The striking design invites play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and shatter-resistant, preventing injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

## Specifications

The Double-Tower Combined Play Structure - Tall with Roof VVZ-VZ2-006-15-T is certified according to STN EN 1176

| | |
|---|---|
| **Age Group:** | 3-14 years |
| **Product Dimensions:** | 5.20 x 1.80 x 3.40 m (L x W x H) |
| **Max. Fall Height:** | up to 1.50 m |
| **Safety Surfacing Area:** | 8.80 x 4.80 m (according to STN EN 1176-1) |
| **Materials:** | Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners |
| **Weight:** | 370 kg |
