VVZ-VZ3-004-15-T Triple-Tower Combined Play Structure - Tall

This triple-tower combined play structure is arranged in an L-shape. Two towers with parapets are connected to the central tower by a diagonal climbing rope wall and a tunnel. Children can climb onto the structure via steps, a sloped climbing wall with handholds, a climbing pole, or a ladder, and descend on one of two slides or via the climbing pole. The distinctive design invites children to play from a distance. The steel structure is weather-resistant thanks to hot-dip galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - colorfast, non-toxic, recyclable, and shatter-resistant, preventing injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is colorfast, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

The Triple-Tower Combined Play Structure - Tall VVZ-VZ3-004-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.20 x 4.10 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	9.70 x 7.70 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	675 kg
