VVZ-VZ8-001-15-T Eight-Tower Combined Play Structure - Tall

An eight-tower combined play structure. Six towers with parapets and two low towers are connected by rope bridges, balance rope bridges, tunnels, and a diagonal rope wall. The structure includes steps, a sloped climbing wall, a vertical climbing wall, a sloped rope net, a vertical rope net, and four slides. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant. This means there is no risk of children being injured by sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical stress. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Eight-Tower Combined Play Structure - Tall VVZ-VZ8-001-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	8.60 x 8.20 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	12.30 x 11.30 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	1660 kg
