VVZ-VZ8-002-15-T Eight-Tower Combined Play Structure - High

Eight-tower combined play structure. Four towers with battlements and four low towers are connected by rope bridges, balance rope bridges, tunnels, and diagonal rope walls. The structure includes steps, a vertical climbing wall, a sloped rope net, a vertical rope net, an arch rope climber, a tic-tac-toe panel, a tunnel, and two slides. The bold design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and coating with durable powder paint. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical stress. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All connections are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Eight-Tower Combined Play Structure - High VVZ-VZ8-002-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	10.60 x 6.50 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	13.70 x 10.20 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	1620 kg
