

## Single-Tower Combined Play Structure - Low VVZ-VZP1-003-15-T

### VVZ-VZP1-003-15-T Single-Tower Combined Play Structure - Low

The single-tower combined play structure is accessible to children via steps and a climbing wall. They can get back down via the slide. The structure also features an abacus panel made of HPL material. This material is chemically resistant, UV-resistant, colourfast, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury to children from sharp edges or splinters. The steel structure is weather-resistant, thanks to galvanising and a durable powder-coated finish. All fasteners are made of stainless steel and covered with plastic protective caps to increase durability and safety.

### Specifications

The Single-Tower Combined Play Structure - Low VVZ-VZP1-003-15-T is certified according to STN EN 1176

|                               |                                                                              |
|-------------------------------|------------------------------------------------------------------------------|
| <b>Age Group:</b>             | 3-14 years                                                                   |
| <b>Product Dimensions:</b>    | 4.20 x 1.00 x 2.35 m (L x W x H)                                             |
| <b>Max. Fall Height:</b>      | up to 1.50 m                                                                 |
| <b>Safety Surfacing Area:</b> | 7.70 x 4.10 m (according to STN EN 1176-1)                                   |
| <b>Materials:</b>             | Galvanised and powder-coated steel, HPL, LDPE, PA, stainless steel fasteners |
| <b>Weight:</b>                | 222 kg                                                                       |
