**VVZ-VZP8-001-15-T Eight-Tower Combined Play Structure - High**

The eight-tower combined play structure consists of six towers with battlements and two low towers connected by a rope bridge, two rope balance bridges and two tunnels. Children can access the structure via steps, a climbing wall and a rope net and return to the ground using one of four slides. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material is chemically resistant, UV-resistant, colour-stable, non-toxic, recyclable and shatter-resistant, helping to prevent injuries from sharp edges or fragments. The ropes are made from polyester fibres wound around a central reinforcement, increasing their strength and resistance to mechanical wear. Polyester is resistant to micro-organisms and weather conditions, dries quickly after rain, is colour-stable and offers high strength. All fasteners are made from stainless steel and covered with plastic protective caps to increase durability and safety.

## Specifications

The Eight-Tower Combined Play Structure - High VVZ-VZP8-001-15-T is certified according to STN EN 1176

| | |
|---|---|
| **Age Group:** | 3-14 years |
| **Product Dimensions:** | 8.60 x 8.30 x 4.00 m (L x W x H) |
| **Max. Fall Height:** | up to 1.50 m |
| **Safety Surfacing Area:** | 12.30 x 11.90 m (according to STN EN 1176-1) |
| **Materials:** | Galvanised and powder-coated steel, HPL, LDPE, PA, polypropylene ropes, corrugated pipe, stainless steel fasteners |
| **Weight:** | 1627 kg |
