VVZ-MP1-05-T Staircase Bridge

The themed bridge with fixed HPL treads is a play product that catches the eye from a distance. The treads are fixed at varying heights for extra fun. It is made of hot-dip galvanised steel finished with a stove-enamelled powder coating. The HPL material used is chemically resistant, UV-resistant, colourfast, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury to children from sharp edges or splinters. The fasteners are made of stainless steel.
