VVZ-MP2-03-T Double Balance Bridge

The maintenance-free combined themed and rope bridge is a play product that lets children train their coordination, stability, and balance. Bridges like this are a suitable choice for playgrounds intended for younger children, as they sit very low and children are not at risk of falling from height. It is made of hot-dip galvanised steel finished with a stove-enamelled powder coating. The ropes are made of polyester fibres wound around a central core, a construction that increases their strength and resistance to mechanical wear. Polyester itself offers many benefits: it is resistant to micro-organisms and weathering, dries quickly after rain, is colourfast, and offers high strength. The fasteners are made of stainless steel. A grass surface may be used as the safety surfacing, although a grass mat is recommended.

Specifications

The Double Balance Bridge VVZ-MP2-03-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.90 x 1.00 x 1.30 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.90 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL, polypropylene ropes, stainless steel fasteners
Weight:	200 kg
