Double Balance Bridge
VVZ-MP2-04-T

VVZ-MP2-04-T Double Balance Bridge

The Double Balance Bridge combines a low-maintenance balance bridge with HPL treads and a fixed arch bridge into a single play product that invites children to train their coordination, stability, and balance. Thanks to its very low height above the ground, this product is a suitable choice for playgrounds designed for younger children, as the risk of falling from height is minimal. The structure is made from hot-dip galvanised steel with a powder-coated finish. The ropes are made of polyester fibers wound around a central reinforcement, which increases their strength and resistance to mechanical wear. Polyester offers a number of beneficial properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and has high tensile strength. All fasteners are stainless steel. A grassed surface may be used as safety surfacing; however, the use of a grass-protection mat is recommended.

Specifications

The Double Balance Bridge VVZ-MP2-04-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.90 x 1.00 x 1.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.90 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL, polypropylene ropes, stainless steel fasteners
Weight:	160 kg
