VVZ-OP1-11-T Monkey trail – Balance walkway

The monkey trail with a balance walkway made of HPL steps suspended on polyester ropes naturally supports the development of coordination, stability, balance and overall agility. As children move across the individual suspended steps, they must continuously adjust their body position to maintain stability. The HPL steps featuring animal tracks add a playful learning element to the physical activity. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
